

CommuniGate Systems

The company that revolutionized Internet Communications

Founded in 1991 and headquartered in Mill Valley, California, CommuniGate Systems has a long and reputable history in the communications industry. From the beginning, CommuniGate Systems has had established subsidiaries in Moscow (Russia) and Munich (Germany) to serve the EMEA market. In addition, Japanese customers are served via a local office in Japan including R&D facilities. In Latin America, regional offices reside in Mexico, Chile and Brazil.

CommuniGate Systems is a privately held company which has been profitable for nine years and has zero debt. Solutions are installed on over 12,000 sites worldwide, with more than 130 million users, including 47 million voice users. CommuniGate Systems is the most trusted and financially stable software vendor maintaining the highest customer satisfaction levels in the Internet Communications industry. The CommuniGate Systems' Customer Advisory Board plays a key role in supplying valuable feedback with regards to product development and market trends for developing the best possible industry solutions.

CommuniGate Systems is a multi-folded company with two solid market positions. Its flagship product suite CommuniGate Pro serves leading carriers as well as the enterprise market starting with 25 user licenses. For more than a decade, CommuniGate Systems brings to its business model, carrier-class solutions to the enterprise and profits vice versa in building the most proven and scalable solutions for carriers. Addressing both markets provides the company with profitability and independence and ensures that the company's strategy stays in scope with the industry. For outreach to the enterprise market CommuniGate Systems acts channel centric with over 175 members in its partner network worldwide.

CommuniGate Systems drives standards in Internet Communications and is actively contributing to associations like SPEC, Mobile Ignite and Open Mobile Alliance. CommuniGate Systems has developed partnerships with companies including IBM, Sun Microsystems, Hewlett Packard, and Apple. CommuniGate Systems also partners with several IP telephony vendors, including Cisco, Ericsson, Broadsoft, IPunity, Genbad, Alcatel Lucent, PolvCom, Voxeo, and several others. Key SaaS Hosting Partners include companies like BT and Arvato-Bertelsmanns. CommuniGate Systems has partnered with Adobe for the development of the Flash/Flex/AIR based Unified Communications client Pronto!

Un-challenged Solutions for Leading Carriers

CommuniGate Systems develops carrier-class Unified Communications and media delivery software for broadband and mobile operators to deliver value-added services and SaaS solutions.

CommuniGate Pro is recognized as the clear leader in providing carriers with Rich Internet Applications and mash-ups to fuel new ways of communication between end users and working in the enterprise - from downloadable podcasts, video marketing, interactive training to interactive video with voting, chat, and more. The All-Active Dynamic Clustering provides multi-million user sites 99.999% uptime and a

Setting the bar for over a decade

1998 CommuniGate Systems was the first to develop a carrier-grade, All-Active Dynamic Clustering solution providing 99.999% uptime for Internet Communications.

2005 CommuniGate Pro set the SPECmail world record in messaging with 2.5 million mail users, surpassing the old record by 67%.

2006 CommuniGate Pro's award-winning All-Active Dynamic Cluster SIP Farm shows proven scalability on HP Integrity Superdome for 10 million subscribers in cooperation with Intel, Navtel Communications and F5 Networks. The benchmark call load generation topped out at 1,000 SIP calls per second (3.6 million calls per hour, each 60s in duration) with up to 192,000 unique registered user-agent endpoints for inbound calling (to subscribed accounts).

2007 The independent benchmark of CT Labs documents CommuniGate Pro setting the bar once again for massive scalability on large scale deployments of IMS, VoIP, and Presence services. Over 220,000 active users on a two-server CommuniGate Pro All-Active Cluster were supported without a single call or registration failure during the test period.

2007 Another benchmark with IBM proved 25 million voice subscribers.

2008 VON Innovator Award and tmcnet Unified Communications recognize CommuniGate Systems' contributions to the delivery of Web 2.0 Unified Communications - voice, video, e-mail, groupware, and multimedia applications.

rolling update capability that no other platform is able to maintain. CommuniGate Pro is the first real-time Internet Communications platform to offer subscribers access to a single source for e-mail, collaboration, voice/video and mobile Internet Communications. CommuniGate Pro allows subscribers a choice of clients – IP phones, soft clients, traditional telephony, mobile devices, browsers and IM agents – all through a single account.

CommuniGate Pro provides flexibility, performance, scalability, with the benchmark proven architecture that remains un-challenged in the industry. Since 1991, the company's mission has been to create the most scalable, feature-rich solutions for Internet Communications based on open standards. The open development environment with simple APIs delivers extensible flexibility for the most demanding application environments.

Customers include Batelco, Cable Onda, Cable & Wirelss, Danger, Locaweb, MegaPath Networks, NeoNova, Slovak Telecom, Tario Communications, Tele2, Telecarrier, TWT and Verizon.

Different and more productive Internet Communications for the Enterprise

CommuniGate Pro in the enterprise is not an Exchange™ replacement rather a different approach increasing corporate wide effectiveness of communications by bringing carrier-grade attributes to the enterprise. CommuniGate Systems powers SMB communications with its Unified Communications Suite including collaboration, VoIP, IM/Presence and mobility. CommuniGate Pro provides enterprises with full Internet Communications with a single address (user@domain.com) allowing any one, any place to use various forms of Rich Media Communications – from e-mail to collaboration, VoIP, Instant Messaging and applications like voicemail and conferencing, all without concepts of toll or location.

Internet Communications is business critical to the enterprise market because business depends upon reliability of communications. Those businesses that have Rich Media Internet Communications gain a competitive advantage - CommuniGate Systems offers the unique, award-winning and world record holding CommuniGate Pro Micro Dynamic Cluster starting with 100 users. Corporations receive five nine's (99.999%) uptime infrastructure with active-active backend servers which can be expanded at any time by just adding nodes

Unlike other carrier-grade solutions, CommuniGate Pro is easy to install and to maintain. Customers state lowest TCO in the market with a fraction of the initial costs as less hardware is needed which inturn reduces the Administration overhead. Among the 9,000 enterprise customers are e.g.: British Airways, Schenker Stinnes Logistics, Car and Truck Rentals, Cargo Partners, Doctors.net, Medical Associates of Northwest Arkansas, Children's Hospital of Oakland Research Institute, Les Notaires de Paris, Warner Music Group, Guava, Gray Television, Aftonbladet, Scholz & Friends.
